#### Quick Details:

Metallic floor coating systems typically incorporate a black primer to help provide as much contrast as possible within the metallic coat itself. Following the primer, metallic pigments are suspended and given ample opportunity to wet out in a clear binder resin. For this step, we typically specify our Clear EP cycloaliphatic epoxy. This is a highly refined water-clear epoxy that will provide for superior flow and metallic effect. Once applied, the metallic epoxy may be modified either mechanically or chemically to create unique decorative effects. Additional colors may also be incorporated to help accent the floor.

#### Features:

1. Seamless, easily cleanable surface
2. Resistant to stains and water
3. Durability
4. High gloss finish
5. Fast application
6. Amazing and unique results

#### Advantages:

Epoxy resin floor coating provides a high-gloss and durable layer. Floor coatings made of 100% solid epoxy can be made to be seamless and chemical, antimicrobial and slip-resistant.

The durable and stunning appearance that comes from this epoxy finish will endure for many years to come, with minimal or no maintenance other than regular cleaning using mild cleaning products.

The floors appear stunning, and your needs for performance are met. Epoxy Resin floors are great for galleries and waiting rooms, showrooms, restaurants, hotels, or any other place that needs to display a touch of glamour.
