Quick Details:

Crekoat offers versatile seamless chip systems that can be tailored to meet specific environmental requirements and installation criteria. Typically, these systems encompass several key layers: a primer, vinyl flake broadcast, grout coat, and topcoat. Primers are available in diverse formulations such as epoxy, polyurethane concrete, or polyaspartic coatings, all tailored to suit the unique demands of each project. These products offer flexibility, allowing for adjustments based on factors like concrete's moisture vapor transmission rates, substrate conditions, and the specific return-to-service timelines for the project.

Features:

1. Seamless, easily cleanable surface
2. Resistant to stains and water
3. Durability
4. High gloss finish
5. Fast application
6. Amazing and unique results

Advantages:

Epoxy resin floor coating provides a high-gloss and durable layer. Floor coatings made of 100% solid epoxy can be made to be seamless and chemical, antimicrobial and slip-resistant.

The durable and stunning appearance that comes from this epoxy finish will endure for many years to come, with minimal or no maintenance other than regular cleaning using mild cleaning products.

The floors appear stunning, and your needs for performance are met. Epoxy Resin floors are great for galleries and waiting rooms, showrooms, restaurants, hotels, or any other place that needs to display a touch of glamour.
