Quick Details:

Deep pour epoxy is the best way to tackle 3-D casting and encapsulating projects! Pour single layers of resin up to 1/2" thick for larger applications, and up to 1" thick for smaller molds. Our clear casting epoxy kits create a clear liquid glass-like finish on bar tops, table tops & counter tops embedded with your favorite objects and photos. Cured epoxy is BPA-free & safer for surfaces in contact with food. Deep pour epoxy resin is also great for deep casting and molding projects to create unique sculptures, figurines, jewelry, and more.

Features:

1. No VOC's and Low Odor
2. Low Viscosity
3. U.V. Resistant & Non-Yellowing
4. Self Leveling Formula
5. High Gloss Durable Finish
6. Heat and Impact Resistance

Advantages:

The Deep Pour Epoxy lends itself perfectly to river tables and projects that require a depth of pour up to 50mm in one go. Adding pigments can create stunning creative looks and elevate your project to a stunning work of art. Optically clear with good UV resistance and very low exotherm. Pour up to 50mm in depth in one pour. Use multiple pours to build up higher depth. Due to the low exotherm you are able to pour up to 50mm with confidence. This low viscosity epoxy resin mixture leaves no hole, crack or opening unattended. The slow curing epoxy emits little to no heat and hardens to a durable and solid finish.
