Deep Pour Epoxy has been engineered to be low-odor, and zero VOC with a slow exothermic reaction to prevent cracking and shrinkage. Adding pigments can create stunning creative looks and elevate your project to a stunning work of art. Optically clear with good UV resistance and very low exotherm. Pour up to 50mm in depth in one pour.

Use multiple pours to build up higher depth. Due to the low exotherm you are able to pour up to 50mm with confidence. This low viscosity epoxy resin mixture leaves no hole, crack or opening unattended. The slow curing epoxy emits little to no heat and hardens to a durable and solid finish.
