Quick Details:

Waterbased Epoxy is a 2 pack waterbased epoxy coating for internal concrete floors. It is low odour, quick drying and provides a durable low sheen finish which can be tinted to a range of colours using Waterbased Tints. It's also an allergy free coating for house slabs.

Ideal as a coloured coating for garage floors, light traffic warehouse floors, office floors. Once coated. the surface can be sealed with Polyurethane Sealer or Urethane Sealer for a harder wearing surface.

Features:

1. Fast Application
2. Easy To Use
3. Non Flammable
4. Fire Resistant
5. Low VOC Low Odor
6. Excellent Adhesion

Advantages:

WB EPOXY displays excellent penetrating properties which consolidates the concrete substrate. At the same time, WB EPOXY produces a surface coating/film that will exhibit outstanding water- and chemical-resistance, excellent resistance to acids, solvents, oils, and gasoline and a superior combination of impact, abrasion, and scuff-resistance. Most importantly, WB EPOXY offers the performance characteristics mentioned above in a water-reducible formulation. In the past, the physical toughness and resistance properties such as those that WB EPOXY will provide was possible only from solvent-borne products. WB EPOXY should be considered for all interior concrete sealing applications where superior durability is required and solvent odors and flammability are not acceptable.
