

Decorative Urethane Floor Coating High Elasticity PU Floor Paint Tough

Our Product Introduction

for more products please visit us on epoxyresinfloorcoating.com

Basic Information

- Place of Origin: CHINA
- Brand Name: CREKOAT
- Certification: TDS, MSDS
- Model Number: PU-7001
- Minimum Order Quantity: 500KG
- Packaging Details: Part A: 20 kg in an iron bucket, Part B: 5 kg in an iron bucket
- Delivery Time: 5-8 working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 300, 000 kg per day

Product Specification

- Features: 2 Pack
- Name: Urethane Floor Coating
- Materials: Polyurethane Floor
- State: Liquid Coating
- Mixing Ratio: 7:1 By Weight
- Shelf Life: 12 Months
- Thickness: 1mm~3mm
- Application: Brush, Roller, Spray
- Highlight: **Decorative Urethane Floor Coating ,
Urethane Floor Coating High Elasticity,
PU Floor Paint Tough**

Product Description

Chemical Resistant Water Based PU Floor Coating Long Pot Life

Product Descriptions:

| | |
|--|---------------------------------------|
| Product Name | 2 Pack Polyurethane Floor Paint |
| Drying time (25°C) | Touch dry≤4 hours / Hard dry≤14 hours |
| Impact resistance 500g steel ball (g·cm) | Pass |
| Wear resistance (700g / 500r) | ≤0.03g |
| Pencil Hardness (H) | ≥3 |
| Coverage (advise 2 coats) | 0.15kg/sqm per coat |

Quick Details:

Polyurethane floors are mainly used in situations where the following features are highly valued:

Decorative

Not only tough and durable, but also beautiful to look at! Available in almost every colour.

UV-resistant

Particularly resistant to UV rays, so it protects against yellowing by exposure to sunlight. Even after years, your floor holds the original colour.

High elasticity

Experience more walking comfort and noise reduction due to higher elasticity. In addition, this floor can be applied on uneven surfaces.

Liquid-tight

No drop can come through this floor! This also makes the floor very easy to clean.

Features:

1. Respectable odor
2. Superior chemical resistance
3. Durability
4. Light stable and gloss retention
5. Fast application
6. UV stability

Advantages:

PU flooring is known to have high resistance to natural chemicals, lactic acids, for instance. This property is what makes PU flooring the best option in the food processing industry because it food grade flooring. However, epoxy flooring does not have resistance towards lactic acids, and it will experience a degree of corrosion and yellowing when coming in contact. Unlike epoxy flooring, polyurethane is known to have higher UV stability. This means the flooring won't turn yellow when exposed to ultraviolet light or sunlight. This gives benefits to users since PU flooring is typically low maintenance once installed.
