Quick Details:

Our road marking paint products are engineered for superior performance in demanding applications, ensuring the formation of visible and durable traffic markings. Our two traffic marking paint offerings are waterborne and solvent-based products. Both serve as effective roadway safety improvement materials when applied and dried properly.

Features:

1. Good adhesion
2. High durability
3. Quick drying
4. Low VOC
5. Fast Application
6. Resistant to color fading

Advantages:

Superior environmental impact - as measured by life-cycle analysis, compared to other pavement marking technologies. Enhanced retention of glass beads and greater flexibility - for extended retroreflectivity and improved night-time visibility. Fast-drying properties - with fast-dry-to-no-pickup and resistance to early rain showers under a wide range of climatic conditions. Improved wear properties - over various bituminous and concrete road surfaces. Low-VOC formulations - that exceed most road-marking paint regulation.
