Solid Content, %	100
Hardness, shore D	≥85
Coverage (advise 2 coats)	0.5kg/sqm per coat

Quick Details:

Metallic Epoxy is a two component, high performance modified cycloaliphatic epoxy concrete floor coating system. Its epoxy chemistry provides excellent bonding characteristics. Typically applied at a 20 mil thick single coat (75 SF/gal). This dynamic blend does not require activator to be sprayed on the surface to obtain a unique and highly decorative look.

Features:

1. Seamless, easily cleanable surface
2. Resistant to stains and water
3. Durability
4. Self leveling
5. High gloss finish
6. Amazing and unique results

Advantages:

Resin floors are a widely used flooring solution. This system utilizes a mix of materials to create a hardened resin surface. This solution is applied in a liquid form, crafting a seamless flooring system. Resin flooring solutions are incredibly durable and built to last. Some thicker types of resin flooring can even be harder than concrete.

By combining our various resins with specific chemical hardeners, the resulting proprietary systems achieve desired levels of chemical-resistance. Therefore, resin flooring is capable of withstanding years of harsh heavy-duty cleanings, making it a viable option for a wide range of applications. Optional additives can be incorporated into resin flooring to achieve desired effects, such as industrial or decorative aggregates, various pigments, decorative multicolored flakes or natural mica chip blends.
