## Product Description

### BPA Free No Vocs Casting Resin Epoxy River Tables Epoxy

#### Quick Details Of Casting Resin Epoxy:

Known as deep cast resins, cast epoxies are used for casts up to 2 inches thick. Casting epoxies are commonly used for river beds, embedding and encasing objects, jewelry, and more. It has a lower viscosity than desktop epoxies and a slower cure rate of 24-36 hours. The longer the curing time of the pouring epoxy, the longer the working time, but care must be taken to keep dust and debris from getting into the resin. Crekoat Epoxy contains no Volatile Organic Compounds or VOCs. That means a safer and healthier work environment when you're stirring, pouring and spreading. And, since the hardener ingredients are BPA-free, tabletops are better suited for limited food contact.

#### Features Of Casting Resin Epoxy:

1. Self-levels as it cures
2. Transparency and high gloss finish
3. No-odor and zero-VOC formula
4. Easy-to-measure 2:1 mix ratio
5. Resists water, UV damage
6. Ideal for resin artworks and DIY projects

#### Advantages Of Casting Resin Epoxy:

Crekoat epoxy resin produces a tough, No VOCs, Low Odor, high gloss, water and scratch resistant coating. The epoxy resin is strong, transparent and fully UV resistant hard as a rock ensuring your artwork and DIY projects durable. Use our clear epoxy resin for all of your casting and coating applications. It can be used on canvas, tile, watercolor, rocks, photos, artwork and bamboo etc. Such as earrings, coffee table, ashtray, crystal glass, vehicle surface seal, river table and whatever you want!
