Product Description

BPA Free Food Safe Clear Epoxy Resin for Wood Table Art Crafts

Quick Details Of Clear Epoxy Resin:

Why is pouring 2" thick epoxy important? Because using a deep cast epoxy specially formulated for the woodworking industry will save you money, time and effort! No need to pour 1/2", 1/4" or shorter time, just wait 24 hours for it to cure enough to add another coat of epoxy. No more sanding between batches of epoxy pours. This is an advanced deep cast epoxy system. Do not use deep pour resin at operating temperatures above 35°C. Consider the volume of epoxy poured into the void. Pouring too much epoxy over a large area may cause shrinkage." Corrosion or cracking.
