Product Description

Carbon Fiber Clear Epoxy Resin For Wood Metal Stone Low Viscosity

Quick Details Of Clear Epoxy Resin:

Our latest ultra clear resin system, designed by our research and development laboratory, specifically addresses the issues of absolute crystal clarity and resistance to sunlight yellowing, while showcasing high mechanical properties suitable for the manufacturing of structural composite materials. We use our resin formula with the lowest viscosity, suitable for adding fillers and powders. It is also suitable for many bonding and impregnation applications, where its low viscosity produces excellent wettability and resin saturation. Suitable for the manufacturing of universal composite materials for wood, metal, stone, and pottery products, as well as for the manufacturing of fabrics using glass fiber, carbon fiber, aramid, and other composite materials.

Features Of Clear Epoxy Resin:

1. Self-leveling ideal for laminating and coating
2. Creates a strong filleting or adhesive
3. Free of solvents, VOC/BPA free
4. Highest UV protection, anti yellowing
5. Durable, water-clear, high-gloss finish
6. Useable on wood, concrete, glass
