Product Description

High Gloss Clear Epoxy Resin Low Yellowing Colored With Dyes Pigments

Quick Details Of Clear Epoxy Resin:

Crystal clear, glass like effect, inserted into small objects, can be colored. The application of medium thickness transparent resin (1cm to 3cm) produces a thicker glass like effect to achieve beautiful visual effects. Unlike low thickness resins (thickness 1-2mm), medium thickness resins can produce a deep visual sensation and give the surface a high gloss with a lens like reflection. When the surface is cured, the product has high durability, low yellowing, and good UV resistance. The surface coated with this resin is only suitable for indoor use. Transparent resins can also be colored with specially developed epoxy based dyes. These dyes make the resin still transparent, but the color is bright and strong.

Features Of Clear Epoxy Resin:

1. Ideal for coatings or castings
2. Convenient 1:1 mix ratio by volume
3. Free of solvents, VOC/BPA free
4. Highest UV protection, anti yellowing
5. Durable, water-clear, high-gloss finish
6. Useable on wood, concrete, glass

Advantages Of Clear Epoxy Resin:

CK-ART1001 A High Viscosity Epoxy Resin, designed for coating and creative applications. An easy to measure 1:1 ratio self-leveling product, with excellent air release properties, is UV Stable, low in VOC's and in odour. This product has been designed to add a diamond-like finish to your resin art, acrylic pours, mosaics, photographs, prints, timber surfaces, sculptures, and more. Can be applied by pouring, brushing on, or with a roller to substrates such as Art Boards, MDF, acrylic sheet, concrete, metal, wood and more.
