Product Description

Low Viscosity Deep Pour Epoxy Resin Making Wooden Tables Flowers Art Works

Quick Details Of Deep Pour Epoxy Resin:

Deep Pour is a large-scale casting resin specifically designed for making wooden resin tables and art works, such as flower protection and lighting fixtures. The ultra-low exothermic reaction prevents the high thickness castings from overheating and deformation. Excellent UV resistance will keep your project crystal clear for a long time. Our self-leveling epoxy resin has low viscosity and bubble release characteristics, which allows you to reduce bubbles during the creation process. The high gloss formula is crystal clear and has a glassy luster after curing, making it more durable and resistant to yellowing.

Features Of Deep Pour Epoxy Resin:

1. Crystal clear and low viscosity
2. Simple 2A:1B mixing ratio
3. Excellent defoaming formula
4. Highest yellowing resistance
5. Self-leveling & high gloss
6. Ideal for all casting and art projects

Advantages Of Deep Pour Epoxy Resin:

Deep Pour epoxy is a two part, crystal clear deep casting resin that is design for projects that require pouring thickness exceeding 2 ". Its convenient formula requires a 2:1 ratio, which will result in stunning projects with glass like finishes. You can even pour multiple thick layers with a depth over 2 inches. Customize your crafts with vibrant colors, such as glitter, mica powder, liquid dye and more! Deep Pour epoxy resin is perfect for a variety of unique projects, from river tables, live edge tables, furniture making, flower encapsulations and embedding, service trays, and so much more!
