Product Description

Bubble-Free Deep Pour Epoxy Resin For River Tables Casting

Quick Details Of Deep Pour Epoxy Resin:

Deep Pour epoxy is a 2 to 1 deep casting resin suitable for applications ranging from 45mm to 75mm deep. Deep Pour Epoxy is a medium viscosity (thickness) epoxy resin, which means it can benefit greatly from degassing and provide a bubble-free surface treatment even up to 75mm. Deep Pour Epoxy is the preferred resin for many users for River Tables. Although this product is designed for mass casting, careful consideration must be given to the control measures of the working environment to ensure that overheating does not occur. For example, use a fan and a thermometer at hand to continue checking if you have everything under control.

Features Of Deep Pour Epoxy Resin:

1. Minimal odour, easy to use
2. Impact resistant: cures super strong
3. Excellent defoaming formula
4. Highest yellowing resistance
5. Self-leveling & high gloss
6. Ideal for all casting and art projects

Advantages Of Deep Pour Epoxy Resin:

Deep Pour epoxy is a two part, crystal clear deep casting resin that is design for projects that require pouring thickness exceeding 2 ". Its convenient formula requires a 2:1 ratio, which will result in stunning projects with glass like finishes. You can even pour multiple thick layers with a depth over 2 inches. Customize your crafts with vibrant colors, such as glitter, mica powder, liquid dye and more! Deep Pour epoxy resin is perfect for a variety of unique projects, from river tables, live edge tables, furniture making, flower encapsulations and embedding, service trays, and so much more!
