

Table Top Deep Pour Epoxy Resin Coatings Quick Drying Heat Release

Our Product Introduction

for more products please visit us on epoxyresinfloorcoating.com

Basic Information

- Place of Origin: CHINA
- Brand Name: CREKOAT
- Certification: SGS, TDS, MSDS
- Model Number: CK-DP2001
- Minimum Order Quantity: 400KG
- Price: US\$4.5-7.5/Kg
- Packaging Details: Bottle/Cartron/Wooden Box
- Delivery Time: 3-7 Working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 1000000 Ton/Year

Product Specification

- Names: Epoxy Coating For Table Top
- Superlative: Casting Epoxy River Tables
- Key Words: Bubble Free, Crystal Clear
- Materials: Liquid Glass Epoxy Resin
- Mixing Ratio: 2:1 By Weight
- Application: Casting, Coating And Art
- Pot Life: 60 Minutes
- Shelf Life: 12 Months
- Highlight: Table Top Deep Pour Epoxy Resin ,
Quick Drying Deep Pour Epoxy Resin ,
Heat Release Deep Pour Epoxy Resin

Product Description

Table Top Deep Pour Epoxy Resin Coatings Quick Drying Heat Release

Quick Details Of Deep Pour Epoxy Resin:

Compared with epoxy resin coatings such as tabletop epoxy resin, the reaction and curing time of deep pouring are much slower. Tabletop epoxy resin usually begins to react immediately after the two parts are mixed. Leaving a large amount of mixed epoxy resin in the container usually leads to an accelerated reaction, resulting in the epoxy resin curing too quickly. The coated epoxy resin will start gel in about 20-30 minutes, feel sticky 4-6 hours later, and curing 12 hours later. Casting epoxy resin requires longer time to react and cure. The heat release during deep pouring is much lower, which is crucial for thick pouring applications. Casting epoxy resin may take up to 48 hours to cure. Due to the long time required for curing, it is crucial to maintain the project in a clean, dry, and dust-free environment throughout the entire curing process.

Features Of Deep Pour Epoxy Resin:

1. Superior air release qualities
2. Very transparent end result
3. Excellent defoaming formula
4. Highest yellowing resistance
5. Self-leveling & high gloss
6. Ideal for all casting and art projects

Advantages Of Deep Pour Epoxy Resin:

Deep Pour epoxy is a two part, crystal clear deep casting resin that is design for projects that require pouring thickness exceeding 2 ". Its convenient formula requires a 2:1 ratio, which will result in stunning projects with glass like finishes. You can even pour multiple thick layers with a depth over 2 inches. Customize your crafts with vibrant colors, such as glitter, mica powder, liquid dye and more! Deep Pour epoxy resin is perfect for a variety of unique projects, from river tables, live edge tables, furniture making, flower encapsulations and embedding, service trays, and so much more!

Product Descriptions Of Deep Pour Epoxy Resin:

Item	Epoxy Resin(A)	Hardener(B)
Appearance	Liquid	Liquid
Color	Transparent	Transparent
Viscosity@25°C	400-600 mPa·s	300-500 mPa·s
Density, g/cm ³	1.07±0.05	0.95±0.03
Mix Ratio	2:1 by weight	
Hardness	Shore, D85-90	
Pot Life	50-60mins@25°C	
Curing Time	24-36hrs@25°C, 16-24hrs@35°C 48hrs, Dry Completely	
Max Pour Depth	10-20cm max per single pour	
Shelf Life	12 Months	
Application	Ideal for all Casting, Coating and Art Projects including Cutting Boards, Coasters, Countertops, Bartop, Resin Art, Resin Jewelry, Coating Artwork and Acrylic Pour Paintings, Geode Paintings, Molds, River Tables
