

White Marble Metallic Epoxy Floor Coating High Gloss Odorless Self Leveling

Our Product Introduction

for more products please visit us on epoxyresinfloorcoating.com

Basic Information

- Place of Origin: CHINA
- Brand Name: CREKOAT
- Certification: TDS, MSDS
- Model Number: CK-MTL2001
- Minimum Order Quantity: 400KG
- Price: US\$4.5-6.5/Kg
- Packaging Details: Bottle/Carton/Wooden Box
- Delivery Time: 3-7 Working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 1000000 Ton/Year

Product Specification

- Variety: Epoxy For Concrete
- World-Class: Metallic Epoxy Coatings
- Key Words: 100% Solids Epoxy Resin
- Materials: Epoxy Clear Coat
- Application: Wood, Ceramic Tile, Concrete
- Mixing Ratio: 2:1 By Weight
- Pot Life: 40 Minutes
- Shelf Life: 12 Months
- Highlight: Odorless Metallic Epoxy Floor Coating

Product Description

White Marble Metallic Epoxy Floor Coating High Gloss Odorless Self Leveling

Quick Details Of Metallic Epoxy Floor Coating:

Metallic Epoxy is a decorative marble look flooring system used for residential and commercial applications, providing various finishes, matte, semi gloss, or high gloss. Unique style, design, and pattern create a beautiful floor that matches the color scheme of your home, exhibition hall, or display surface. Pearlescent metallic pigments are used in epoxy resin to form a unique marble floor coating. Metallic glossy floor coatings are the latest technology that integrates artistic and industrial applications. Very suitable for commercial applications and residential customers in retail environments. This product is odorless, self leveling, and easy to use.

Features Of Metallic Epoxy Floor Coating:

1. Hygienic and slip-resistant
2. Long lifespan and gorgeous aesthetic
3. Custom colors and textures available
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
