## Product Description

### Commercial Metallic Epoxy Floor Coating Withstand Heavy Vehicle Traffic

#### Quick Details Of Metallic Epoxy Floor Coating:

Use high-quality epoxy resin coating systems designed specifically for commercial and industrial environments. The epoxy coating system is seamless, which means there are no seams between the coatings. This type of system provides a seamless, high gloss finish that is attractive and easy to maintain. The seamless epoxy resin flooring system is very suitable for commercial and industrial environments because it is durable, wear-resistant, and can withstand heavy pedestrian and vehicle traffic. In addition, the seamless nature of the floor makes it easier to clean and maintain, reducing the need for frequent repairs or replacements. Overall, metallic epoxy flooring systems are an excellent choice for businesses that require durable, and easy to maintain flooring solutions.

#### Features Of Metallic Epoxy Floor Coating:

1. Create a unique, glamorous look
2. Slip-resistant and safe to walk on
3. Custom colors and textures available
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

#### Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
