Product Description

Shiny Flakes Metallic Epoxy Floor Coating Color Concrete Floors

Quick Details Of Metallic Epoxy Floor Coating:

Bringing the beauty of metallic coatings and the additional elasticity and lifespan of epoxy coatings to concrete floors. Gives the floor an astonishing luster, pearlescence, iridescent, swirling, metallic luster, and depth. The ordinary concrete foundation in your home, lobby, exhibition hall, gym, or corridor looks like clouds, waves, rotating liquids, or the depths of space. By combining a colored primer with special metallic or mica nanoparticles, personalized metallic epoxy resins are created. In addition to choosing the color of epoxy resin, you can also choose the color, size, and type of shiny flakes.

Features Of Metallic Epoxy Floor Coating:

1. Fast drying, drive on 24 hours
2. Impervious to chemicals
3. Custom colors and textures available
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
