Product Description

Residential Metallic Epoxy Floor Coating White Effect Produce Marble Luster

Quick Details Of Metallic Epoxy Floor Coating:

The metallic floor coating contains pearlescent and Iridescence colors, which can produce marble luster. These glossy floor coatings are the latest solutions for commercial applications, retail environments, and many residential customers who want to differentiate their homes from others. Our amazing and easy to install metallic system is perfect for any garage, basement, bathroom, or indoor living space. Few surfaces can achieve an amazing finished appearance like professionally installed metalised epoxy flooring. These floors have a deep milky white effect that mimics Lava lamp, liquefied metallics and other unique effects.

Features Of Metallic Epoxy Floor Coating:

1. Trap moisture and keeps rooms cool
2. Great for bathroom, or interior living spaces
3. Custom colors and textures available
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
