## Product Description

### Marble Granite Look Metallic Epoxy Paint Custom Colors Textures

#### Quick Details Of Metallic Epoxy Floor Coating:

The biggest benefit of using a metallic epoxy floor coating may be that it allows for extensive customization of the floor. What most people don't know about metallic epoxy resin is that it can never be perfectly replicated, even by the same contractor who initially installed the flooring, making all metallic epoxy resin flooring a work of art. Metallic epoxy resin has no boundaries in customization, for the following reasons: Metallic epoxy resin can be made using various professional methods, smoothing methods, and even large scrapers. This is the reason for endowing metallic epoxy resin with ideal surface treatment.

#### Features Of Metallic Epoxy Floor Coating:

1. Environmentally friendly and VOC-free
2. Strong, durable protection of epoxy
3. Custom colors and textures available
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

#### Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
