Product Description

UV Resistance Deep Pour Epoxy Resin For Crafting River Tables

Quick Details Of Deep Pour Epoxy Resin:

Deep pour epoxy resin is a specialized type of epoxy known for its remarkable ability to cast thick layers, surpassing conventional depths. This resin empowers artisans to delve into uncharted creative territories by accommodating substantial pours, making it an ideal choice for crafting river tables, intricate art pieces, and durable countertops. Its unique self-leveling properties ensure a smooth, glossy finish, while impressive UV resistance maintains clarity and vibrancy over time. Minimized bubble formation during curing results in creations with exceptional transparency. Moreover, its adaptability through coloring, processing, and polishing allows artists to bring diverse visions to life. Many variants of deep pour epoxy resin also align with eco-friendly standards, emphasizing sustainability in creative pursuits. Overall, its distinct features—high viscosity, self-leveling prowess, UV resistance, bubble reduction, adaptability, and eco-friendliness—position it as an innovative choice for various artistic and practical applications.

Features Of Deep Pour Epoxy Resin:

1. Boasts long-lasting resilience
2. Ensuring the durability and endurance
3. Brings depth and dimension to your creations
4. UV resistant, highest yellowing resistance
5. Self-leveling & high glossy
6. Ideal for all casting and art projects

Advantages Of Deep Pour Epoxy Resin:

Deep Pour epoxy is a two part, crystal clear deep casting resin that is design for projects that require pouring thickness exceeding 2 ". Its convenient formula requires a 2:1 ratio, which will result in stunning projects with glass like finishes. You can even pour multiple thick layers with a depth over 2 inches. Customize your crafts with vibrant colors, such as glitter, mica powder, liquid dye and more! Deep Pour epoxy resin is perfect for a variety of unique projects, from river tables, live edge tables, furniture making, flower encapsulations and embedding, service trays, and so much more!
