## Product Description

### Stunning 3D Effects Metallic Epoxy Floor Coating Can Be Applied Over Existing Concrete Floors

#### Quick Details Of Metallic Epoxy Floor Coating:

In the realm of flooring options, traditional epoxy flooring and metallic epoxy flooring exhibit notable distinctions. Traditional epoxy floors typically offer a solid color or speckled finish, providing a clean and uniform appearance. In contrast, metallic epoxy flooring showcases a visually captivating marbled effect with a glossy metallic sheen, achieved by blending metallic pigments into transparent epoxy resin and manipulating them during installation to create intricate patterns and depth. While traditional epoxy flooring emphasizes durability and practicality, metallic epoxy flooring excels in artistic expression and customization, making it a premium choice for those seeking a unique and luxurious flooring solution that adds a touch of sophistication to any space.

#### Features Of Metallic Epoxy Floor Coating:

1. Can be applied over existing concrete floors
2. Stunning 3D effects achievable
3. Customizable colors and patterns
4. Easy to apply, clean and maintain
5. Naturally de-foaming with no ripples
6. Decorative marble appearance flooring

#### Advantages Of Metallic Epoxy Floor Coating:

Metallic epoxy floor coating is a low yellowing epoxy resin mixed with metallic pigments. Tiny, shimmering pigments are mixed into the epoxy and poured onto the floor or substrate. When these paints are stirred by a brush or roller, they gather, separate, twist and reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments lock into place, giving them a three-dimensional, swirly appearance. Metallic epoxy floor coatings are not only look beautiful, but can meet all your performance needs. They are perfect for living rooms, office, restaurants, galleries and more.
